Education

Oregon State University

09/2020 – 12/2023

B.S. in Computer Science

GPA: 3.45

Linn-Benton Community College

09/2017 – 06/2020

A.S. in Computer Science

Skills

- **Programming & Tools:**
 - C++, Python, C, JavaScript, CSS, HTML, Java, Kotlin
 - MySQL, InfluxDB, MongoDB, Git, Android Studio, Bluetooth Low Energy (BLE)
- **Game Engines:**
 - Gamemaker & Unity
- **Specialty Certifications:**
 - S130/S190 Wildland Firefighter Certification
 - S131 Firefighter Type 1 Squad Boss & Incident Commander Type 5 Certification
 - S212 Chainsaw Certification & Certified Class "2" Faller
 - Red Cross Certified First Aid & CPR

Professional Experience

Miller Timber Services Inc

06/2017 - Current

Firefighter Type 1 – Squad Boss

- Led, trained, and supervised multiple 20-person wildland firefighting crews over 8 fire seasons, operating across diverse terrains and high-risk environments throughout the United States
- Guided team members through life-threatening situations providing decisive leadership under extreme stress
- Utilized Avenza Maps route planning software, and GPS to assess terrain, weather, and fire behavior, building strong skills in data interpretation, situational analysis, and real-time decision-making
- Worked in the protection of hundreds of residential and commercial infrastructure during wildfire operations and prevented the spread of fire across thousands of acres of forest and grassland

Sparkling Cleaning Services

Web Developer & Cleaning Technician

06/2017 – 12/2021

- Designed and developed a responsive website for a residential cleaning business using HTML, CSS, and JavaScript
- Built an interactive pricing tool that estimated cleaning costs based on the number of bedrooms and bathrooms
- Provided detailed and reliable cleaning services for residential clients, helping build a loyal customer base
- Trained new employees, teaching cleaning standards and effective time management practices

Academic Project

Senior Capstone – Pour Souls

09/2022 – 06/2023

Student Software Engineer

- Developed an Android application using Android Studio to interface with an Arduino in a beer tap via Bluetooth Low Energy (BLE) and upload data to InfluxDB, completely eliminating data loss.
- Designed and implemented backend integration using InfluxDB, successfully logging and visualizing real-time data.
- Acted as Scrum Master, organizing sprint planning and daily stand-ups for a team of 5, ensuring 100% sprint completion.
- Collaborated with a team of 5 engineers to integrate the application with existing systems enhancing overall system functionality.
